

# Parity Software's Auto Posting

## Overview

Parity Software's Auto Posting meets the critical business issue of efficient and accurate automatic posting of Microsoft Dynamics GP Batches with no manual intervention.

Auto Posting is ideal for all organizations that have batches within their system. Auto Posting ensures that all batches are automatically posted so that transactions are reflected in the Microsoft Dynamics GP system without any delay.

## Features

- Auto Posting allows standard Microsoft Dynamics GP batches to be posted without requiring users to post the batch manually.
- Microsoft Dynamics GP batches can be posted overnight, which does not slow down systems.
- Auto Posting provides the option to fetch and post all batches.
- Auto Posting includes posting of series General Ledger, Receivables Management, Payables Management, Sales Order Processing, Purchase Order Processing and Inventory.

## Business Issues

Auto Posting ensures that all accounting entries are up to date with reports reflecting accurate Financial data. Efficiency is increased by using Auto Posting to perform tedious manual tasks.

Batches are auto posted after they are created. Auto Posting ensures that a business has up to date Accounting transactions reflecting correctly in the financial system.
