

Parity Software's Delivery Manager

Overview

Parity Software's Delivery Manager meets the business issue of the critical control of Cash and Inventory handled by drivers and vehicles.

Delivery Manager provides Sales Order Processing document and Inventory management from the point of despatch to the point of delivery. The most cost efficient delivery schedule is generated according to the assigned Debtor Routes. The allocation of invoices to Delivery Schedules, and signed Proof of Deliveries can be controlled.

Features

- Enables delivery routes and their corresponding Debtors to be sequenced according to location
- Assigns Invoices to routes
- Tracks the signed Proof of Deliveries that have been returned
- Handles full stock returns by creating SOP return documents
- Tracks vehicle usage
- Manages the receipt of Cash or Cheques

Business Issues

The control required over delivery routes, monies received from Customers and Proof of Deliveries is efficiently achieved with Delivery Manager. Specific aspects of vehicle usage can be managed, thus providing much needed control and cost efficiency.
